

PETER ODERO

Full-Stack Developer

Nairobi, Kenya • +254 743 572 403 • oderopeter287@gmail.com • linkedin.com/in/peter-odero-0129062b3 • github.com/Peterodero

PROFESSIONAL SUMMARY

Full-stack developer with experience in designing, building, and shipping production web applications across the MERN and PHP/Symfony stacks, with working exposure to Java, Spring, and Angular. Comfortable owning a feature end-to-end — from REST API and database design through to responsive, user-facing interfaces. Proven track record delivering AI-integrated products, custom CMS platforms, fintech-adjacent dashboards, and real-time systems in fast-moving team environments.

TECHNICAL SKILLS

Frontend: React.js, Angular, Tailwind CSS, SCSS, CSS3, HTML5

Backend: Node.js, Express.js, PHP (Symfony), Java, SpringBoot, REST APIs

Databases: MongoDB, MySQL, PostgreSQL

Mobile: Flutter (cross-platform development)

Tools & DevOps: Git, GitHub, Docker, Vercel, Render, Dokploy, Postman, VS Code

Other: Machine learning integration (MERN), SEO best practices, Agile collaboration

PROFESSIONAL EXPERIENCE

Backend Developer — *Iguru Software Company*

Current

- Develop and maintain scalable backend systems and REST APIs powering web and mobile applications for clients across multiple industries.
- Rebuilt a vendor financial dashboard backend from Node.js/Express into PHP Symfony 7, containerised with Docker and deployed via Dokploy.
- Built and debugged core Symfony/Doctrine services for a real estate management platform, including JWT authentication, serialization groups, and computed entity fields.
- Collaborate with frontend and mobile teams to define API contracts, ensuring seamless integration and reliable data delivery.
- Contribute to database design, query optimisation, and server-side business logic in a professional team environment.

Full-Stack Web Developer (Freelance) — *Self-employed*

Ongoing

- Architect and deliver end-to-end web applications covering both frontend UI and backend APIs.
- Built an AI-driven Smart Education System enabling students to track academic performance and receive personalised course recommendations.
- Designed and implemented custom CMS solutions for multiple clients, improving content management efficiency and user engagement.
- Developing an AI-powered internal issue-tracking system to automate client issue intake and resolution workflows.
- Attended a MERN stack bootcamp in Kisumu, applying learnings to build highly scalable production systems.

Front-End Web Developer — *Iguru Software Company*

Current

- Develop and maintained responsive, accessible, and visually polished websites using React.js, Node.js, Tailwind CSS, and SCSS.
- Collaborate in cross-functional teams to optimise website performance, user experience, and search-engine ranking.
- Represents the team at a UI/React conference, building interactive interfaces and sharing learnings with the wider engineering team.
- Integrate front-end components with RESTful back-end APIs, ensuring reliable data flow and consistent UX across devices.

EDUCATION

BSc Computer Science

Masinde Muliro University of Science and Technology, Kakamega, Kenya

Relevant coursework: Web Development, Database Management, Software Engineering, AI and Machine Learning, Data Structures & Algorithms

ADDITIONAL STRENGTHS

- Strong communicator — comfortable engaging clients, stakeholders, and cross-functional teams to align on requirements and deliver results.
- Leadership & mentorship — mentors junior developers, coordinates project tasks, and champions engineering best practices.
- Continuous learner — regularly attends industry events and independently explores emerging technologies such as AI/ML integration.
